

VADLAKONDA AKSHAYA

SDE Intern Candidate | B.Tech CSE (Data Science) | CGPA: 9.01 | Dept. Rank 3 | 2027 Batch

vadlakondaakshaya@gmail.com | +91 6300121604 | [linkedin.com/in/akshaya-vadlakonda](https://www.linkedin.com/in/akshaya-vadlakonda) | github.com/Akshayaaa121 | Hyderabad, India

EDUCATION

Geethanjali College of Engineering and Technology

B.Tech, Computer Science & Engineering (Data Science)

Hyderabad, India

Jun 2023 – 2027 (Expected)

- CGPA: 9.01/10 | Department Rank 3 | 2027 Graduating Batch
- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Linear Algebra, Probability & Statistics, Optimization Techniques, Data Mining

INTERNSHIP EXPERIENCE

Software Engineering & AI Intern — Taskveda Sales, Hyderabad

Jun 2025 – Jul 2025

- Stack:** Python, Java, TensorFlow, Scikit-learn, Flask, REST APIs, Git
- Designed and built scalable ML pipelines in Python and Java using OOP principles for classification and regression tasks across 10+ datasets; followed agile sprint-based development cycles with regular code reviews.
- Applied algorithm-driven feature engineering and hyperparameter optimization with cross-validation, improving model accuracy by 15–20%; optimized pipeline performance using efficient data structure choices.
- Deployed three production-grade software applications — chatbot, digit recognition, and regression model — each with a Flask REST API layer, achieving up to 92% accuracy in real-world usage.

PROJECTS

Fake News Detection System | [GitHub](#)

Jun 2025 – Jul 2025

- Stack:** Python, Java, Scikit-learn, TF-IDF, Flask, REST API, OOP, Data Structures
- Designed a scalable NLP classification system using hash maps and inverted index structures (TF-IDF) to process 20,000+ articles; built an OOP-architected Flask REST API with Gemini AI for explainability.

Movie Recommendation System | [GitHub](#)

Jan 2026 – Feb 2026

- Stack:** Python, Algorithms, TF-IDF, Cosine Similarity, Feature Engineering, Streamlit
- Built a recommendation engine applying vector space algorithms over 5,000+ movies; optimized time complexity for sub-second query response and designed modular, scalable architecture.

AI Resume Analyzer | [GitHub](#)

Mar 2026 – Apr 2026

- Stack:** Python, LLM APIs, Prompt Engineering, PDF/DOCX Parsing, Streamlit, REST APIs
- Built a scalable multi-module document processing pipeline (parser → analyzer → report generator) with clean separation of concerns; integrated LLM APIs for real-time ATS analysis and report generation.

TECHNICAL SKILLS

- Programming Languages:** Python, Java, C (strong DSA proficiency across all three)
- Data Structures & Algorithms:** Arrays, Linked Lists, Trees, Graphs, Hash Maps, Sorting, Searching, Dynamic Programming, Complexity Analysis (Time & Space)
- Software Development:** OOP, System Design Basics, REST APIs, Agile/Scrum, Git, GitHub, Modular Architecture, Problem Solving
- Machine Learning & AI:** Scikit-learn, TensorFlow, Keras, NLP, Feature Engineering, Pandas, NumPy, Matplotlib
- Web & Tools:** Flask, React.js, Node.js, HTML, CSS, JavaScript, Streamlit, VS Code, Google Colab, Jupyter Notebook
- Core CS:** DBMS (SQL), Operating Systems, Computer Networks

CERTIFICATIONS

- Infosys Springboard – Artificial Intelligence — [Verify](#)
- MongoDB Associate Developer (Jan 2026) — [Verify](#)
- IBM – Artificial Intelligence Fundamentals (Feb 2026) — [Verify](#)
- Cisco Networking Academy – Advanced Programming in C (Jun 2024) — [Verify](#)

ACHIEVEMENTS

- Secured Department Rank 3 (CGPA 9.01/10) in B.Tech CSE Data Science — consistent top performer across all semesters.
- Competed in IEEE Xtreme 19.0 – International Competitive Programming Contest, solving complex DSA problems under strict time constraints against global participants.
- Recognized for outstanding performance in Algorithms, Data Structures, and Software Engineering coursework and project delivery.
