

VADLAKONDA AKSHAYA

Machine Learning Engineer — Data Science Student

Interested in Optimization, Operations Research, and Data-driven Decision Systems

Hyderabad, India

vadlakondaakshaya@gmail.com | +91 6300121604

EDUCATION

Geethanjali College of Engineering and Technology

Computer Science and Engineering (Data Science) (CGPA: 9.01)

Hyderabad

Jun 2023 – Present

Alphores Junior College

Intermediate in Mathematics, Physics, and Chemistry (Percentage: 98%)

Karimnagar

Aug 2021 – May 2023

RELEVANT COURSEWORK

- Probability & Statistics, Linear Algebra, Optimization Techniques, Data Structures & Algorithms, Data Mining

INTERNSHIP EXPERIENCE

AI & Deep Learning Intern

Jun 2025 – Jul 2025

Taskveda Sales, TS

- Engineered ML pipelines using Python, TensorFlow, and Scikit-learn for classification/regression on 10+ datasets.
- Preprocessed data, performed feature engineering, and applied hyperparameter optimization with cross-validation, improving accuracy by 15–20%.
- Deployed real-world ML applications, including chatbot, digit recognition, and regression models, achieving up to 92% accuracy.

PROJECTS

Movie Recommendation System | [GitHub](#)

Jan 2026 – Feb 2026

- Tech Stack:** Python, Recommendation Systems, TF-IDF, Cosine Similarity, Feature Engineering, Streamlit
- Developed content-based movie recommendation system using genres, keywords, cast, and crew from 5000+ movies.
- Applied vector space modeling and similarity optimization techniques using TF-IDF and cosine similarity for ranking recommendations.
- Deployed via Streamlit with sub-second response for interactive experience.

AI Resume Analyzer | [GitHub](#)

Mar 2026 – Apr 2026

- Tech Stack:** Python, Streamlit, Generative AI, LLM Integration, Prompt Engineering, Document Processing
- Built a GenAI-powered system to analyze resumes for ATS optimization, generating summaries and interview questions.
- Implemented PDF/DOCX parsing with real-time LLM-based feedback using prompt engineering.
- Developed an interactive web app with instant analysis and downloadable reports.

Fake News Detection | [GitHub](#)

Jun 2025 – Jul 2025

- Tech Stack:** Python, Scikit-learn, Classification Models, TF-IDF, Flask, Explainable AI
- Built an ML-based web app to classify news as Fake or Real using NLP and TF-IDF on 20K+ articles.
- Integrated Gemini AI to generate contextual explanations, improving interpretability (Explainable AI).
- Designed an interactive UI with confidence scoring, suspicious word highlighting, and real-time analysis.

SKILLS

- Programming Languages:** Python, Java, C
- Mathematics & Optimization:** Probability, Linear Algebra, Optimization Basics
- Machine Learning & Data Science:** Supervised Learning, Model Optimization, Scikit-learn, TensorFlow, Keras, NLP, Feature Engineering, Model Evaluation
- Data Analysis & Visualization:** Pandas, NumPy, Matplotlib
- Web Development:** HTML, CSS, JavaScript
- Tools & Platforms:** Git, GitHub, Streamlit, Jupyter Notebook, Google Colab, VS Code, Anaconda
- Core Computer Science:** Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Problem Solving

CERTIFICATIONS

- Cisco Networking Academy – CLP Advanced Programming in C (Jun 2024) — [Verify](#)
- MongoDB Associate Developer (Jan 2026) — [Verify](#)
- IBM – Artificial Intelligence Fundamentals (Feb 2026) — [Verify](#)

ACHIEVEMENTS

- Secured Department Rank 3 (CGPA 9.01/10) in Data Science specialization.
- Competed in IEEE Xtreme 19.0 – International Competitive Programming Contest.
- Recognized for outstanding performance in Machine Learning coursework and projects.
